EXPERIENCE

Hoku | Core Full-Stack Engineer (Cloud & Platform) Cert

June 2025 – Jan 2026

Early-stage SaaS startup building a consumer platform with 1,000+ active users.

- Owned backend API design and frontend features, building authentication and access control used across the platform.
- Built services in **Node.js** with a **Next.js PWA** frontend, fixing session handling and production reliability issues.
- Deployed the system on **Azure** using **Docker** and set up automated releases with **GitHub Actions**.
- Migrated the database from **MongoDB** to **PostgreSQL** and added **Redis** caching to improve performance.

NetworkGeek | Software Engineering Intern (Mobile & Integrations) Cert

Nov 2025 – Dec 2025

Built and delivered the company's complete production mobile application.

- Developed a full-featured **Flutter** mobile app by porting existing **REST APIs** from the web platform.
- Implemented secure **token-based authentication** and protected API communication for core user workflows.
- Integrated backend services and business logic to achieve full feature parity with the web application.

Fanpit Technologies | Software Engineer (Platform & Performance) Cert

Jul 2025 – Sep 2025

Loyalty network platform connecting users with brands, restaurants, events, and online stores.

- Developed a blog and content system supporting platform announcements and feature updates.
- Improved frontend responsiveness across core user journeys, reducing interaction latency by 30%.
- Corrected backend request validation and access-control flaws across multiple protected endpoints.

PROJECTS

STACKED | Personal Media Tracking Platform

Aug 2025

Built a media tracking platform delivering consumption analytics across movies, TV, anime, and books.

Integrated external APIs (TMDB, AniList, Open Library) with 96% metadata reliability.

Designed a normalized data model and caching strategy for scalable user libraries and fast metadata lookups.

Designed secure REST APIs using JWT-based authentication, rate limiting, and Docker-based deployment.

AWOL.IT | College Attendance System

Nov 2025

Built a Flutter application used by 500+ students for attendance tracking and academic planning.

Adopted by students to replace manual tracking and reduce last-minute eligibility uncertainty.

Integrated OCR via Google ML Kit, reducing manual timetable entry by 83%.

Implemented analytics, alerts, and academic calendar sync using Supabase.

Alumni Career & Networking Hub

Aug 2025

Built a full-stack networking platform connecting students and alumni.

Implemented role-based access, alumni verification, and secure interactions using PostgreSQL RLS and REST APIs.

Win Your Argument | Evidence-Based Tool

Oct 2024

Built a chat-based assistant supporting claims with peer-reviewed evidence using RAG pipelines.

Reduced hallucinations by grounding responses strictly in cited scientific sources.

Indexed 1,000+ papers from arXiv and PubMed with relevance-ranked retrieval and citations.
